Project Title

Web Site Name

- ~~가회유음 (佳會愉飲) : It means “Let’s have a nice drink at a beautiful gathering”~~

Topic

- ~~1. Reviews of various alcoholic beverages (ex. How to make cocktails)~~
- ~~2. Impressive pub Review~~
- ~~3. Tips on how to relieve hangover~~

We changed the subject through the meeting
because it was not academic contents.

Step.1

Project Title

Web Site Name

- Coding Jump : It means to jump into coding as a programming learning site.

Topic

1. Web Sites that can learn about programming.
2. We organize and share what we have learned about programming.

Motivation & Goal ?

- It is hoped that those who knew nothing about coding like us should pay attention and learn one by one.
- Therefore, our goal is for those who have difficulty programming to see what we have learned and shared, to be interested and improve their skills.

Related work

- Reference was made to various menu structures regarding programming learning.

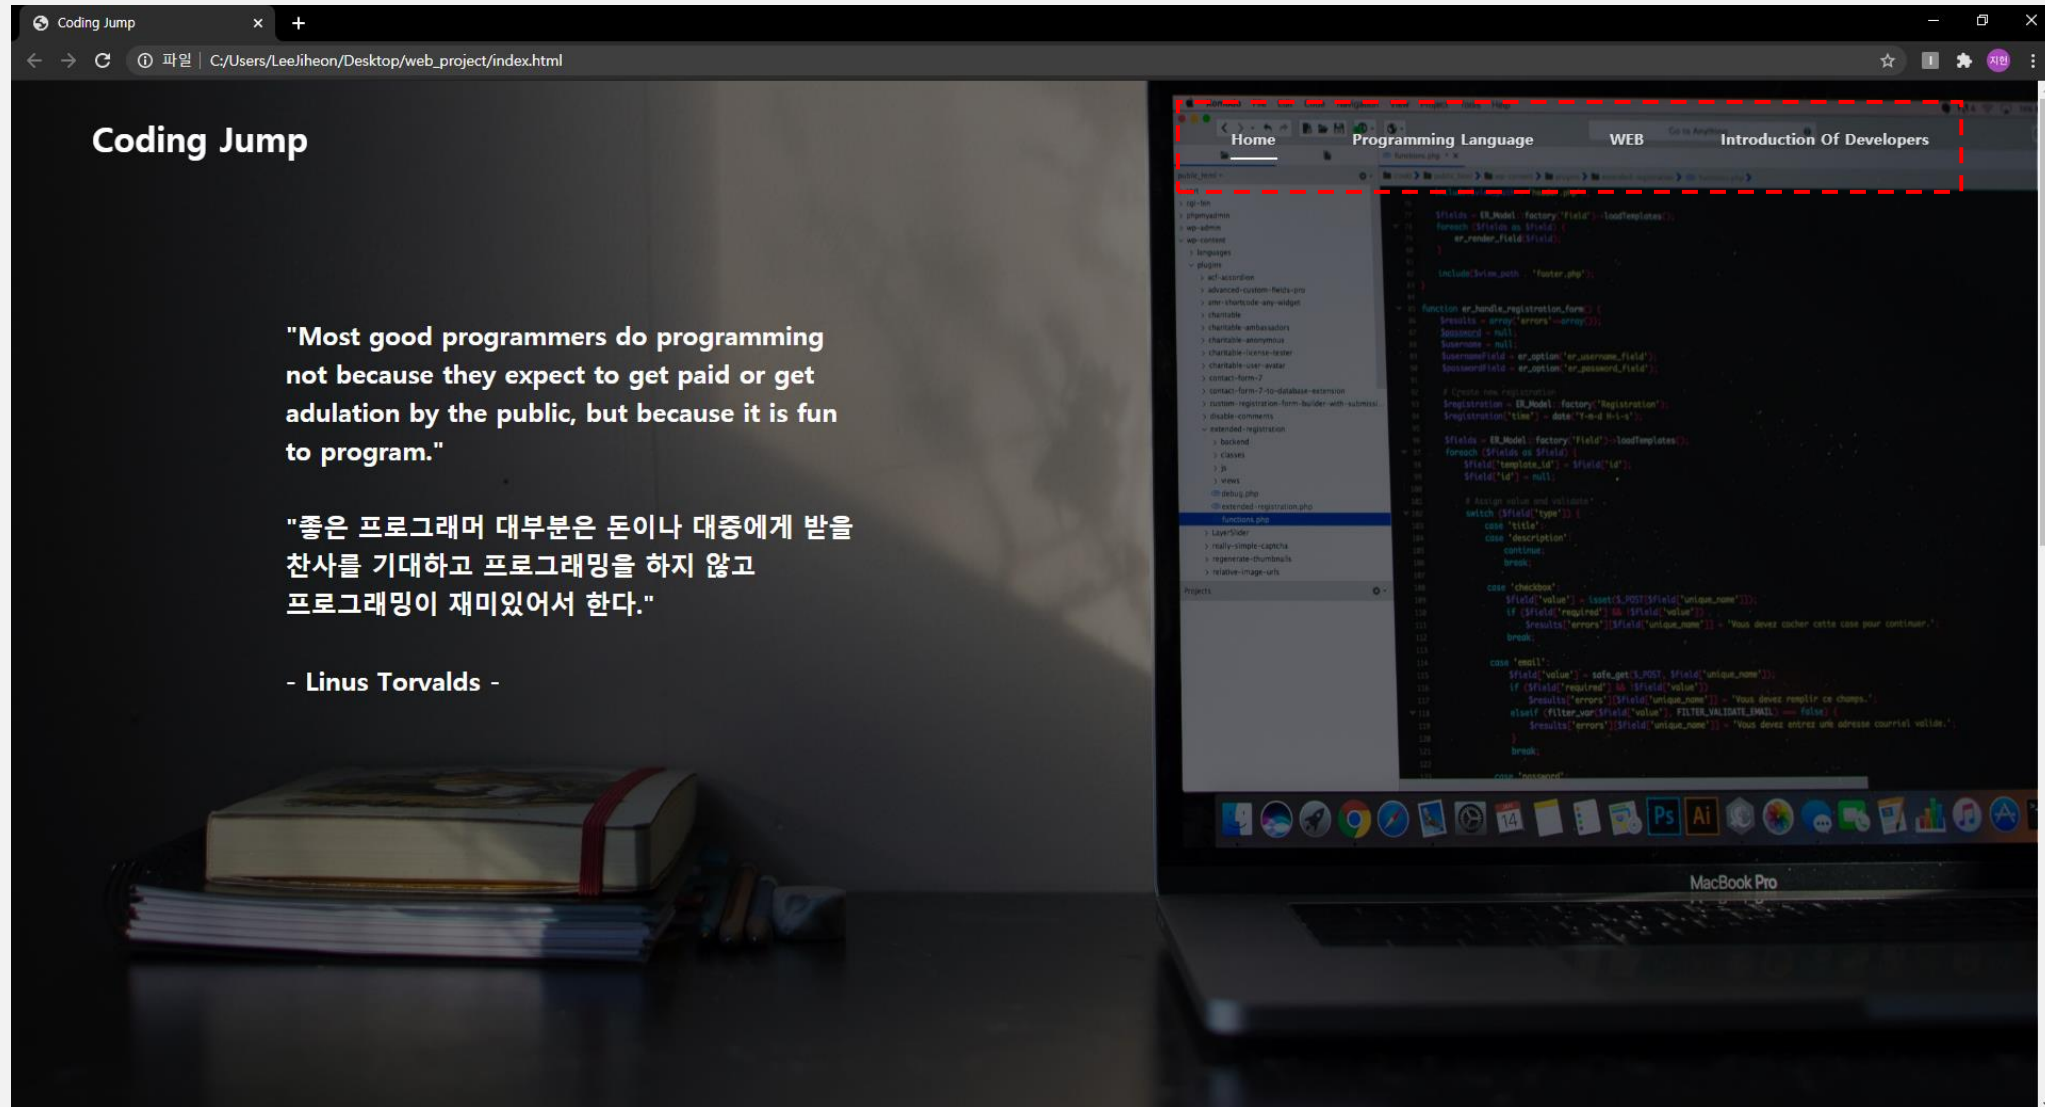

Reference Web Site : <https://opentutorials.org/course/1>

- This site was showing the menu in an iframe and we referred to it because we wanted to apply what we learned.

Special point & Pros and Cons

Special point

- That we share what we have learned about programming.

Pros

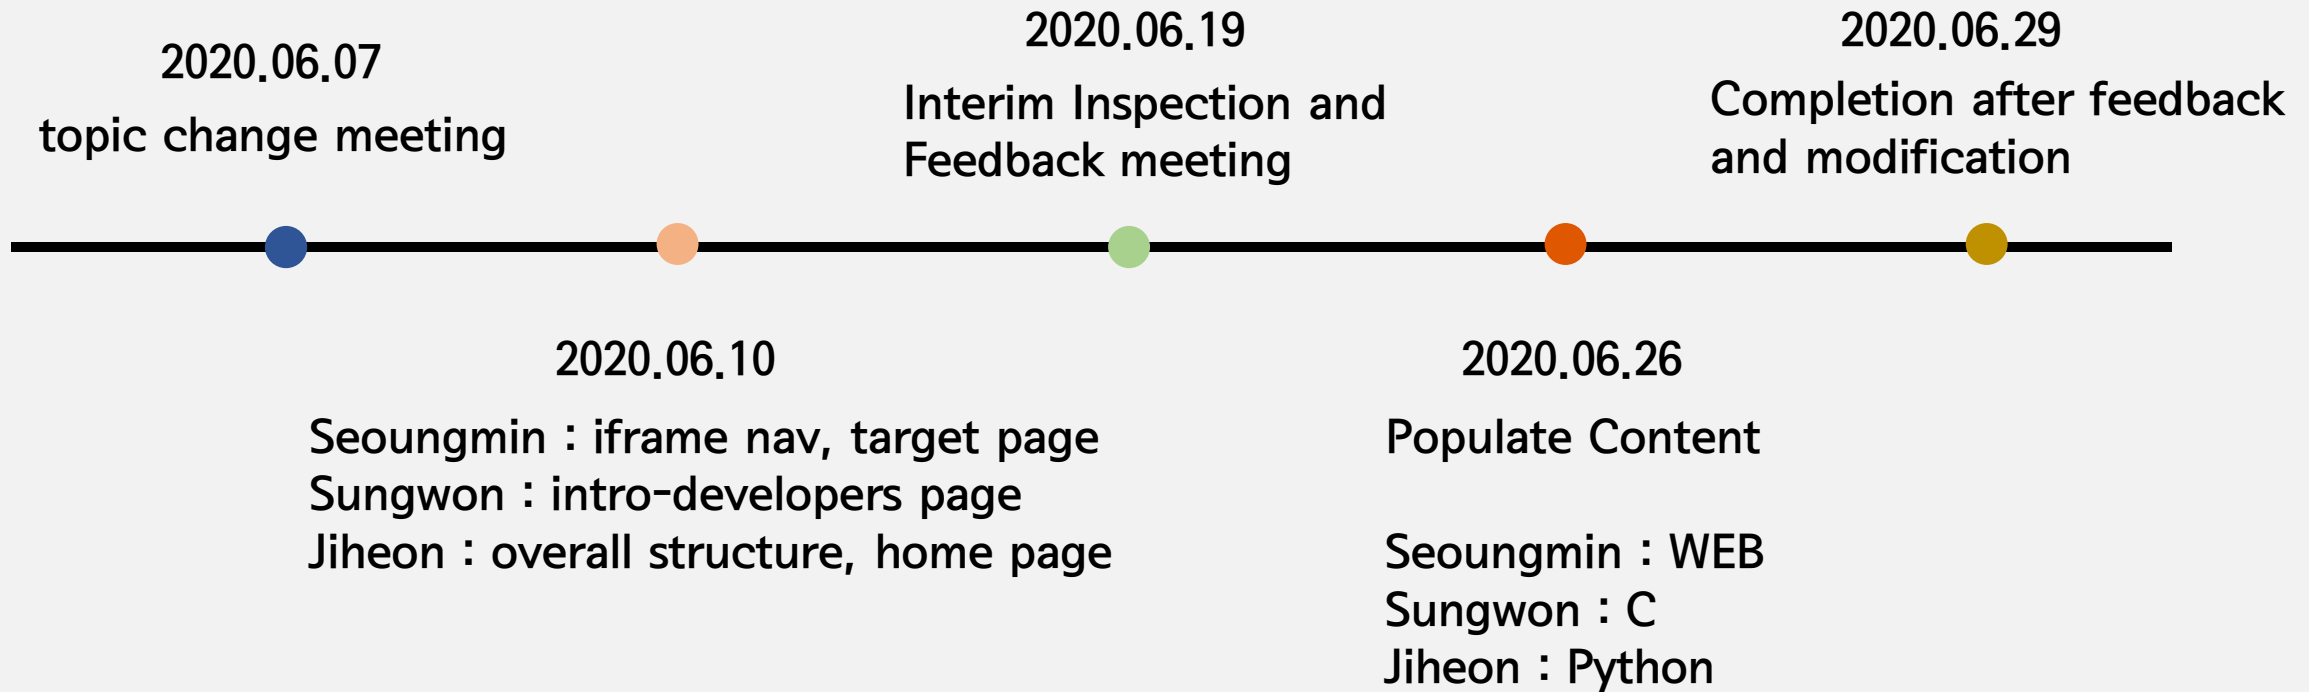

- We learn and share, and users can improve coding skills together while learning what we share.

Cons

- Due to lack of time to proceed with the project, many contents could not be filled. And it would be nice to have a bulletin board function that can communicate with users.
